JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

directed, he would be subject to great delay and trouble. The agents have informed me that all these captains must have been instructed and that they did not heed their instructions, or else carelessly forgot them. I have taken up this matter so often and gone into it so minutely that it has become almost a farce. The Northern Pacific agent, Mr. Clark, has had many instructions concerning what articles were considered suspicious and how we wanted the cargo handled, and has repeatedly assured me that the matter has been brought before the proper officers of the company again and again. The officers of the last three vessels to arrive had all this explained to them by myself personally upon previous trips, and the fact that they made some effort to do as directed in regard to the cargo proves that they knew of the regulation.

Respectfully,

M. H. FOSTER,
Assistant Surgeon, U. S. M. H. S.

[Inclosures.]

PORT TOWNSEND, WASH., *February 6, 1900.*

To steamship companies and others:

An order having been issued by the Surgeon-General of the Marine-Hospital Service that hereafter all eggs, yams, sugar cane, and similar articles packed in soil, coming from plague-infected ports, should be disinfected at this end unless viséed by an officer of the Service at the port of departure, I have to request that you notify your agents in foreign ports of the order and ask that they have articles of this nature placed in the hold in one compartment and in such a position that they will be readily accessible on arrival here. This arrangement has been made with companies running lines to other ports on this coast and will expedite the quarantine inspection here, which is our constant inspection, as well as your own.

Any further information we can supply on this matter will be cheerfully given.

M. HUGH FOSTER,
Assistant Surgeon, U. S. M. H. S., In Command.

PORT TOWNSEND, WASH., *November 10, 1900.*

To steamship companies and others:

Hereafter all Chinese and Japanese food stuffs liable to plague infection, including goods from the soil, packed in soil, dried fish, dried ducks, etc., will not be allowed to pass this station without being disinfected here, unless viséed by our officers abroad. These goods should come packed in an accessible part of the hold, each package marked by our officers, and the invoice accompanied by a certificate to the same effect. As the arrival of a vessel with this merchandise not so prepared will cause a great deal of delay, I would advise you to cable this condition to your agents abroad.

M. H. FOSTER,
Assistant Surgeon, U. S. M. H. S., In command.

A case of smallpox in Cairo, Ill.

CAIRO, ILL., *November 27, 1900.*

SIR: I have the honor to report that a patient suffering with smallpox presented himself for treatment at this office this morning. He has been admitted to the isolation hospital.

This is the first case in this city since July 21, 1900. It was about this time last year that the disease made its appearance here.

From the history of the case, infection occurred at Vicksburg, Miss. The patient, colored, came from Vicksburg to Cairo via Memphis, being in the latter city two days. He had a chill on Friday, but has been working ever since. Patient states that "the country is full of it" about Vicksburg, where it is treated as the "Cuban itch."

Respectfully,

JOHN MILTON HOLT,
Assistant Surgeon, U. S. M. H. S., In Command.
